

{MAD Team 17} Team Charter

Team Members	Harjapan Singh (harjapansingh120405@gmail.com) Muhammad Ahmed (ahmedazeemmemon@gmail.com) Mehak Chughani (mehakchughani17@gmail.com) Praprara Owedeha-Ashaka (ozomepra@gmail.com) Rooheen Ahmad Farooqi (roheenahmad125@gmail.com) Shubham Chaubey (shubh0987chaubey@gmail.com)
Team Lead	Mehak Chughani (mehakchughani17@gmail.com)
Team Members Roles and Responsibilities	Mehak Chughani -Team Lead, represents the team in sponsor interactions via email, reducing the risk of miscommunication. Muhammad Ahmed - Project Lead, responsible for holding the group accountable for meeting deadlines and ensuring that the project deliverables are being met. Rooheen Ahmad Farooqi - Project Co-Lead, responsible for holding the group accountable for meeting deadlines and ensures that the project deliverables are being met with Muhammad Ahmed. Praprara Owodeha-Ashaka - Quality Assurance (QA) / Tester, Rigorously tests the application to identify bugs before launch. Run through the cybercrime cases as a learner would, verifying that the hints work correctly, the question progression doesn't break, and the admin panel updates seamlessly, etc. Shubham Chaubey – Flutter Developer, develops and maintains the cross-platform mobile application using Flutter. Implements responsive user interfaces, integrates APIs, ensures smooth navigation and functionality, fixes bugs, optimizes performance, and collaborates with designers, backend developers, and QA to deliver a high-quality user experience.

	Harjapan Singh – Backend Developer, designs and maintains the server-side architecture of the application. He develops APIs, manages databases, and ensures secure data handling with authentication and authorization. His role includes optimizing backend performance, integrating frontend requests with backend services, fixing bugs, and collaborating closely with the Flutter developer, designers, and QA team to deliver a reliable and scalable system.
Mission, Vision Objectives & Core Values	Mission: <i>Our mission is to work as a collaborative and accountable team, committed to developing a functional and user-friendly Flutter application. By combining our skills, fostering open communication, and meeting project milestones, we aim to deliver a reliable product that features well-designed interfaces, seamless API integration, and is supported by thorough testing and documentation. This approach ensures not only the success of the application but also the growth of our teamwork and technical expertise.</i> Vision: <i>Our vision is to grow into a collaborative, innovative, and skilled development team that successfully delivers a high-quality Flutter application while continuously learning and evolving together. By the end of the internship, we aspire to strengthen our expertise in cross-platform mobile development, API integration, version control, testing, and documentation. Through this journey, we aim to create a portfolio-worthy project that reflects our commitment to excellence and prepares us for future careers in technical fields.</i> Objectives: • <i>Plan and design the app's navigation flow and wireframes designs to clearly define the user journey and interface layout.</i> • <i>Develop essential screens including Login, Home, and Program Details to establish the foundation of the application.</i> • <i>Integrate mock APIs to present dynamic data and simulate backend functionality.</i>

	• <i>Add user registration and feedback features to enhance usability and engagement.</i> • <i>Perform end-to-end testing, maintain detailed documentation, and ensure the application is fully prepared for deployment.</i> Core Values: • Accountability – <i>Taking responsibility for tasks, meeting deadlines, and delivering reliable results.</i> • Innovation – <i>Encouraging creativity and seeking better solutions to enhance functionality and user experience.</i> • Quality – <i>Following best coding practices, performing thorough testing, and keeping documentation well-organized.</i> • Collaboration – <i>Working together respectfully, sharing ideas openly, and supporting each other to achieve common goals.</i> • Respect – <i>Valuing diverse perspectives, fostering teamwork, and treating everyone with dignity.</i> • Continuous Learning – <i>Embracing feedback, exploring new concepts, and improving technical and teamwork skills throughout the journey.</i>
Internal Checks, Balances, and Reviews	<i>For effective progress tracking, the team will adhere to these structured review methods:</i> • Sprint Reviews – <i>Conduct short sprint reviews at the end of each cycle to track progress and adjust priorities.</i> • Peer Code Audits – <i>Team members will audit each other's code to ensure consistency, readability, and maintainability.</i> • Branch Management – <i>Use GitHub with structured branching (feature, develop, main) and pull requests for controlled integration.</i> • Feature Validation – <i>Test each new feature independently before merging into the main build to avoid conflicts.</i> • Knowledge Logs – <i>Maintain updated documentation for workflows, APIs, and feature changes to support onboarding and clarity.</i> • Retrospectives – <i>Hold regular retrospectives to gather feedback from mentors and teammates, focusing on improvements in teamwork and technical practices.</i>

Operations: • Assignments • Meetings • Communication Guidelines • Status Updates • Deadlines	Assignments <i>Tasks will be distributed based on each member's role and expertise, with responsibility for timely completion and progress updates. Key assignments include reviewing the syllabus, creating the project plan, drafting the report, and delivering the final Flutter application</i> Meetings • Weekly Team Syncs – Hold regular team meetings every week through Google Meet to review progress and plan next steps. • Ad-hoc Discussions – Schedule additional sessions whenever urgent issues or new requirements arise. • Mentor Check-ins – Meet with the mentor as per the internship schedule to receive guidance and feedback. Communication Guidelines • Google Chat will serve as the primary channel for daily communication and quick updates. • GitHub will be used for managing source code, handling branches, and enabling collaboration. • Google Meet will be the platform for team discussions and virtual meetings. • All communication should remain professional, with respect for each member's ideas and contributions. Status Updates • Each member will share weekly progress updates during scheduled meetings to keep the team aligned. • Any blockers, challenges, or delays must be communicated immediately to the team for timely resolution.
	Deadlines <i>Project milestones and weekly deliverables will be set during team meetings, with each member responsible for timely task completion and regular progress updates. Any blockers or delays must be communicated immediately to avoid disrupting the team's workflow and ensure smooth project progress.</i>
